Subject: Midlothian Manor

Mr. Croke,

In response to your inquiry yesterday, staff from the Lake County Planning, Building and Development Department have not conducted any recent inspections at the Midlothian Manor site except in response to concerns brought to our attention by third parties.

Two such instances were:

- In November 2016 we were advised of a sign and balloons placed on the property welcoming PADS residents. The building owner was advised of the sign and was going to investigate.
- In February 2016 we were advised of signs on or near the property. The building owner was advised of the signs and was going to investigate.

No further action was taken by this department.

As of this date there have been no other requests for inspections at this site. No certificates of occupancy have been issued. PADS does not have approval from our department to occupy the building.

Robert D. Springer CBO
